

EPIC Manual Bender Machine with Hydraulic

100% Australian designed and manufactured at Epic's workshop in Sydney, New South Wales. Epic has been manufacturing and selling sheet metal processing machinery for over 35 Years

Epic's Manual Bending Machines (Pan Brake & one Piece Folders) with hydraulic assist is made up from Epic's well known complete manual bending Machine systems (Pan Brakes and Folders) with a basic Hydraulic System installed for when bending the sheet metal material

Standard Features:

- Screw adjustment for material thickness
- Adjustable clamping and bending beam
- Clamp beam lifts up to 150mm
- Large bronze bushes with proper grease nipples for lubrication at all points of wear
- Just like Epic's complete range of machinery, The Design and fabrication of Epic's manual folders and pan brakes have benefitted from Epic's ongoing improvements.
- High tensile steel Apron blade
- Hydraulic System for hydraulic bending, operated using hydraulic hand valve and powered by either 240V or 3 Phase kits

Pan brake (Segmented Clamp System) features:

- High grade flame hardened clamping fingers, Fingers are located on a machined dovetail
- Standard back stop setup

Optional Pan Brake features:

- One-piece clamping blade with inserted high tensile steel blade.
- TDF Bed Slots

Machines are available in:

1240mm x 2.0mm
1860mm x 2.0mm
2460mm x 2.0mm
3085mm x 1.6mm
3710mm x 1.6mm
4020mm x 1.6mm
