Custom Solutions in Metal Fabrication

Product Specifications

Product Name: 1250mm x 1.6mm 240V Australian Made Guillotine

Manufacturer: Keech Engineering

Website: www.keechengineering.com.au

Key Features

- Cutting Capacity: 1250mm x 1.6mm (3mm for Aluminum)
- Voltage: 240V, Single Phase
- Origin: Australian Made
- Customization: Tailored to Specific Requirements
- Safety Features: Full Guarding, Backstops, Square Arm
- User-Friendly: Roving Foot Pedal for Easy Operation
- Reliability: Low Maintenance, Ideal for Schools, TAFE, and Workshops

Product Description

The Keech Engineering 1250mm x 1.6mm 240V Australian Made Guillotine is a versatile metal cutting solution designed to meet your specific requirements. With a cutting capacity of 1250mm x 1.6mm (3mm for aluminum), this guillotine is perfect for various applications.

Key Benefits:

- Australian-Made: Quality craftsmanship built in Australia.
- Customization: Tailored to your needs for maximum efficiency.
- Safety: Equipped with full guarding, backstops, and square arm for secure operation.
- User-Friendly: A roving foot pedal ensures easy and safe cutting.
- Low Maintenance: Reliable and durable for schools, TAFE, and workshops.
- Versatile: Operates on 240V single-phase power supply.
