

WHY CINCINNATI®?

C I N C I N N A T I I N C O R P O R A T E D

OVER 100 YEARS OF INNOVATION, ENDURANCE, AND PERFORMANCE.

Since their founding in the late 1890's as The Cincinnati Shaper Company, CINCINNATI Incorporated has built its reputation on three principles: innovation, performance and endurance. From their modern plant and technical centre on a 700-acre site near Cincinnati, Ohio, Cincinnati Inc design and build machines to the standard of ruggedness required by industry - with premium engineering features that stand up to years of rigorous use in demanding environments. This philosophy is evident in their range of laser cutting machines and material handling systems. For further insight in how Cincinnati can benefit your business, contact us at Industrial Laser.

CL400 series CO2 laser machines
for full range cutting to 30mm

CL900 series Fibre laser machines
for ultra high-speed cutting

Cincinnati choose PRC lasers for their CO₂ models, but you don't need to buy a new machine to reap the benefits of PRC's innovations:

- + Low Gas Consumption (via GEM Filter Technology)
- + Lifetime Electrodes and Glassware
- + No Turbine Rebuilds
- + Remote Diagnosis
- + 2 Year Warranty

We can replace your tired laser with a 2.5kW PRC for as little as \$135k; 4kW for only \$175k.

Rental plans are available.

Sole Australasian Distributor:
